The newly-constructed 5-Megawatt AC array would interconnect to the existing NYSEG grid. Posts will be pounded into the ground to hold racking and solar modules. Concrete pads would hold any transformers, inverters or other equipment required for utility metering and grid interconnection.

Project Company is in negotiations to lease land from new land owner 2194 State Hwy 206, LLC for a term of 25 years with options to extend for two 5-year terms. The specific acreage to be subdivided, leased and built upon is still under development.

Customers are those who purchase electricity from NYSEG, like residents, businesses, schools, hospitals, emergency service headquarters, religious institutions, manufacturers and other local entities. They will be able to purchase "green" solar power shares at a 10% discount, on a first come, first served basis, without investing thousands of dollars and maintenance hours into roof- or ground-mounted systems on their own properties. The 10% savings on electricity and delivery charges on their bills could amount to \$80-100,000 a year or over \$2,000,000 over the lifetime of the project.

This project will further bolster New York State's Reforming the Energy Vision (REV) mandate that 70% of electricity come from renewable sources by 2030. In addition, this project supports the community's Comprehensive Plan goals to promote renewable energy resources, reduce consumption of fossil fuels and reduce production of greenhouse gas emissions.
